

Wenn Sie unterschiedlichste Profile rollen wollen!

Fast alle genormten Gewinde oder Sondergewinde – von zylindrischen und kegeligen Spitzgewinden über Trapez-, Rund- und Halbroundgewinden bis zu zylindrischen Holz- und sogar Sägewinden – können gerollt werden.

Außerdem:

- Rändelungen
- Ringprofile ohne Steigung
- Reduzieren von Rohrenden
- Kumpeln von Rohren
- Glätten von Oberflächen
- Sonderprofile
- Formrollen

When you want to roll a variety of profiles!

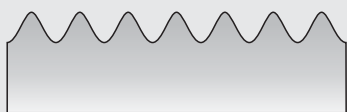

Almost all standardized or special threads – from cylindrical and tapered triangular threads, through trapezoidal, round and semi-round threads to cylindrical wood threads and even buttress threads – can be rolled.

And what is more:

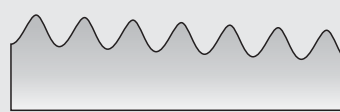

- Knurling
- Ring profiles without pitch
- Reduction of pipe ends
- Pipe forming
- Smoothing surfaces/burnishing
- Special profiles
- Form rolling

Spitzgewinde

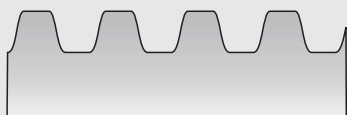

Triangular thread

Kegeliges Spitzgewinde

Tapered triangular thread

Trapezgewinde

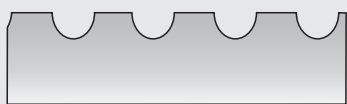

Trapezoidal thread

Rundgewinde

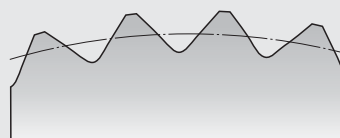

Round thread

Halbrundgewinde

Semi-round thread

Kerbverzahnung DIN 82 90°

Splining DIN 82 90°

Sägewinde LMT Fette Norm 10°

Buttress thread LMT Fette Norm 10°
